HECTOR CLIMENT AÑÓ

PROFILE

With more than 7 years of experience in IT and telecommunications, I have developed a solid career as a Cloud Infrastructure Architect, combining my passion for technology with a self-taught mindset.
My focus is on implementing scalable and efficient solutions in Cloud environments, as well as automating processes using infrastructure as code.

(Approved subjects: Databases, programming, Development environments and Systems)

CERTFICACIONES

- Microsoft Azure (Az900, Az104)

INFORMÁTICA

🕐 Cloud Infrastructure: Extensive experience in Azure, AWS and Google Cloud, including management of virtual machines, networks, WAF, firewall, backups, load balancers, DNS, VPNs, and more.

🕐 Terraform: Infrastructure as code expert, using Terraform to deploy and manage Cloud environments in an automated, efficient, and reproducible manner across multiple platforms.

🕐 Virtualization: Expert in virtualization technologies such as VirtualBox, VMware (ESXi, vSphere), Hyper-V and Proxmox.

🕐 Systems Administration: Solid knowledge in operating systems administration, including Windows, Linux (CentOS, RedHat, RockyLinux), and Mac.

🕐 Database Administration: Database management with SQL Server, MySQL, MariaDB, and CouchDB.

🕐 Network Administration: Experience in configuring and managing networks using Cisco, Fortinet and CheckPoint technologies.

🕐 Hardware: Competent in hardware installation, maintenance and repair.

🕐 CRM and CMS: Management of CRM platforms and content management systems such as WordPress, Drupal, Umbraco, PrestaShop, and Shopify.

🕐 Google Suite: Experiencia con Google Analytics, Ads, Business, Merchant, y Search Console.

🕐 Programming and Scripting: Proficient in programming and scripting languages, such as Bash, Powershell, HTML5, XML, Java, Python, and PHP.

🕐 Windows IoT: Implementing and managing IoT projects using Raspberry Pi.

⊙ Enterprise Platforms: Management of enterprise platforms, including ERP and MDM.

⊙ Containers: Experience managing containers using Kubernetes, Docker, and Azure Containers.

⊙ Technical Support and Administration: Skill in managing technical support and ticketing through tools such as Slack, Jira and FreshDesk.

⊙ DevOps and Version Control: Experience in DevOps project management, handling GitHub for version control and development collaboration, and automation of CI/CD processes.

⊙ SIEM and Monitoring: Administration and configuration of SIEM systems such as Splunk and Microsoft Sentinel. Infrastructure monitoring with tools such as Nagios and Zabbix.

⊙ NAS and Raspberry Pi: Knowledge in the implementation of NAS and projects with Raspberry Pi.

⊙ Software Development: Specialization in the implementation of projects using .NET, PHP and Java.

⊙ Payment Gateways: Configuration and integration of payment gateways such as Redsys and Paytef.

⊙ POS and Pinpads: Implementation and maintenance of POS and Pinpads (Verifone, Ingenico, Spire).

⊙ Systems for Service Stations: Implementation, training and maintenance of computer systems for service stations (Avalon, FullGas, Industrial Informatics 2i).

⊙ Editing and Graphic Design: Intermediate handling of Photoshop CC for editing, design of advertising banners and posters.
